

PRUTHVI PATEL

Mobile App Developer

@ pruthvikp8613@gmail.com patelpruthvi.github.io Vadodara, Gujarat

SUMMARY

Experienced with developing mobile applications that prioritize both functionality and user experience. Utilizing cross-platform development skills to build versatile and robust applications. Knowledge of integrating APIs and optimizing performance to ensure seamless app experiences.

EDUCATION

B.Tech in Computer Engineering

Charotar University of Science & Technology (CHARUSAT)

11/2020 - 10/2024 Nadiad, Gujarat

GPA
9.3 / 10

EXPERIENCE

Flutter Developer

Oats Tech

10/2025 - Present Punjab, (Remote)

Technologies: Flutter, Firebase, REST APIs, Provider, Riverpod.

- Actively worked on revamping payment flows, improving UI/UX, and resolving production issues using Flutter, along with platform-specific integrations (Kotlin/Swift).
- Introduced OTA updates via Shorebird, implemented deep linking, and improved app scalability by optimizing state management with Riverpod and GetX.
- Owned build and release processes across TestFlight and Play Console, while resolving platform-specific challenges, such as push notifications and WebView behavior.
- Partnered closely with engineering and product teams to ensure stable releases, compliance alignment, and consistent behavior across different environments.

Flutter Developer Intern

Oats Tech

06/2025 - 09/2025 Punjab, (Remote)

Technologies: Flutter, Firebase, REST API, GetX.

- Contributed to the development and improvement of mobile app features, particularly around payment flows, account handling, and UX enhancements.
- Regularly addressed production issues, improved UI consistency, and optimized performance across Android and iOS.
- Worked closely with backend, web, and product teams to integrate APIs, meet compliance requirements, and maintain design consistency across platforms.

Mobile Application Developer

Mapsense Technologies

10/2024 Gurugram, (Remote)

Technologies: Flutter, SQLite, API, BLoC, Kotlin, and Java.

- Built a consumer-focused mobile application for tracking and visualizing driver location data using Flutter.
- Enabled user-contributed data collection and visualization of GeoJSON/KML datasets on interactive maps.
- Implemented elevation profile charts to provide detailed geographic insights to users.
- Integrated REST APIs and local storage using SQLite for efficient data handling.

Mobile Application Developer Intern

Mapsense Technologies

04/2024 - 09/2024 Gurugram, (Remote)

Technologies: Flutter, SQLite, BLoC, REST APIs.

- Developed a driver-centric mobile application using Flutter, with BLoC architecture for scalable state management.
- Integrated GIS and Google Maps to enable live location tracking, route visualization, and geofencing capabilities.
- Consumed and managed REST APIs for real-time data exchange and driver operations.

EXPERIENCE

Flutter Intern

Agevole Innovation Pvt. Ltd.

📅 12/2023 - 03/2024 📍 Surat, Gujarat

Technologies: Flutter, SQLite, BLoC

- Designed, developed, and deployed a task planner application from scratch using Flutter.
- Implemented BLoC architecture to ensure scalable, maintainable, and testable state management.
- Integrated SQLite for offline-first task storage and efficient local data persistence

Backend Developer

Charusat Learning & Development Club

📅 05/2023 - 09/2023 📍 Changa, Gujarat

Technologies: Flutter, Firebase

- Collaborated with a team to develop the backend for a client's machine rental application using Firebase
- Collaborated with a cross-functional team to build backend features for a client-facing machine rental application using Firebase.
- Implemented multiple authentication methods, including Google Sign-In and phone number authentication.
- Supported application usage for over 200 active users, focusing on performance and data consistency.

PROJECTS

Easy Dictionary

🔗 https://play.google.com/store/apps/details?id=com.pruthvi.easy_dictionary

- A simple mobile application built using Flutter, lets an individual improve his vocabulary, learn and pronounce new words. Easy Dictionary is crafted with Flutter, REST API integrations, Provider, Github Actions and Fastlane. Its user interface and word of the day feature are its major highlights

Task Planner

🔗 <https://play.google.com/store/apps/details?id=com.agevole.taskplanner>

- A Developed and deployed a Task Planner app using Flutter, SQLite, and BLoC architecture during an internship at a startup. The app features task creation, management, and reminders, allowing users to efficiently organize and track their activities.

Interactify

🔗 <https://github.com/PatelPruthvi/interactify>

- Interactify- An Instagram Clone crafted with Flutter, Firebase, and BLoC, lets users follow, like, and post pictures effortlessly. Let's users explore others by real-time notifications and discover new connections while easily searching for users by username.
